## CLASSES DESCRIPTION

<p><b>Manos a la obra</b> (Fun Spanish classes for little kids)</p>	<p>It is important that children are exposed to the language from a young age, in this way their children will benefit to the maximum from the words, stories, songs and conversations they hear in the target language. This class helps the child reinforce the areas of language and literacy. As children begin to understand and speak more in Spanish, they will no longer stop, but will speak more and more and show their understanding of the language.</p> <p>Learning a new language requires patience and perseverance!</p>
<p><b>Ciencia en español</b></p>	<p>The science class could include any of these topics: Earth, animals, and Technology. The goal of science class is to provide children with an opportunity to observe, touch, and ask questions. Using science as a tool to learn Spanish, children will experience and develop an awareness of the world around them through meaningful and fun activities. Students will be able to learn Spanish through scientific activities, beginning first with a vocabulary list and then using it in expressions and basic sentences related to each topic.</p>
<p><b>Beginning Spanish 1</b></p>	<p>The Spanish classes are designed for students with little or no previous study on Spanish. The course introduces students to the basic language of the Spanish-speaking people. During the sessions, students will be able to use simple phrases to identify, understand and ask for situations, people, and places. The target language will be used mainly to satisfy immediate communication needs. Students can introduce themselves and others, ask for and give basic personal information. They also will be able to communicate in an elementary way as the interlocutor speaks slowly and clearly.</p>
<p><b>Beginning Spanish 2</b></p>	<p>This class is a continuation of <b>Beginning Spanish 1</b>. Students will continue reinforcing the elementary concepts of grammar, vocabulary, conversations, and culture, focusing on activities and routines used in daily life beyond school and home. This course will also develop skills through reading, writing, and listening tasks, as well as multiple choice quizzes, spelling practice, and other language comprehension activities.</p>

<p><b>Conversational Spanish</b></p>	<p>This class is designed to create the necessary basis for students to be bilingual. Students will communicate in Spanish in a fun, effective, and relaxed ways. Students will begin to develop their Spanish proficiency through extensive interaction in the target language. We focus on all four language skills: listening, speaking, reading, and writing. Culture is an integral part of the course and is introduced through use of media, games, readings, and class discussions. Pronunciation and oral proficiency are main goals.</p>
<p><b>¡Aprender jugando!</b> (Learning Spanish through games)</p>	<p>When children play, they are developing especially important areas for growth such as memory, attention, and concentration. All these benefits are also applied in language learning. For many children learning another language could be incredibly stressful; however, if we change the teaching methodology for a fun activity that releases stress, children will be more receptive to learning. Learning through games is a task-based exercise that will help children work in sequence and reinforce language through repetition, they will learn to give and receive instructions, and achieve goals.</p>
<p><b>¡Mochileros!</b> A virtual trip to Mexican pyramids</p>	<p>One of the best ways to improve Spanish skills is traveling. This course will take the students on a memorable trip to Mexican pyramids to explore not only the language but also the traditions of the three of the main Mexican indigenous cultures: Mayas, Aztecas and Teotihucanos. Students will learn new regional expressions to enrich their vocabulary.</p> <p>Get ready your “mochila” (backpack) and your passport!</p>
<p><b>Intermediate Spanish</b></p>	<p>This class is designed for students who already have previous experience with the Spanish language. It could be from a bilingual program at school, from a Spanish-speaking family or any other contact with the language. The class is mainly focused on strengthening the areas of oral comprehension and conversation. Students will participate in activities that allow them the consolidation of skills acquired at the introductory level. They will also increase their Spanish proficiency in real-context terms.</p>

<p><b>Reading and writing practice for Highschoolers-</b> (Intermediate-advanced level)</p>	<p>The objective of this course is to learn and improve the language by reading, analyzing, and writing literature in Spanish. Students will explore some literary genres in Spanish (poetry and short stories). This course might be an excellent practice for those people who want to develop and go further in their Spanish language skills. Through practice, students will be able to improve the syntax and semantics of Spanish. Their writings will not only be a tool for practicing Spanish but will help them develop their writing skills in general.</p>
<p><b>High School Spanish 1</b></p>	<p>Spanish 1 is designed as an introductory course for beginners, and as such, will establish a strong foundation and promote future success in Spanish learning for years of study to come. The course will provide the student with a general introduction to the Spanish language: sound system, pronunciation, functional vocabulary related to everyday life, cultural information, and basic grammatical structures. The two main objectives of the course are to provide students with the ability to maintain a simple conversation with a correct understanding of vocabulary and grammatical rules, as well as to teach them the basics of Latin American culture.</p>
